Instructions:

Code the page in HTML, CSS, JavaScript. Do not use plugins such as jquery or bootstrap, write your own codes. Use CSS display grid, and display flex to implement responsive UX. Use picture element to display images, and use smaller images for mobile screen size. Maximum page width is 1350 pixels. Implement image lazyloading for all images, load them only when it becomes visible on the browser. Use the following fonts: https://fonts.google.com/specimen/Inter, https://fonts.google.com/specimen/Readex+Pro.

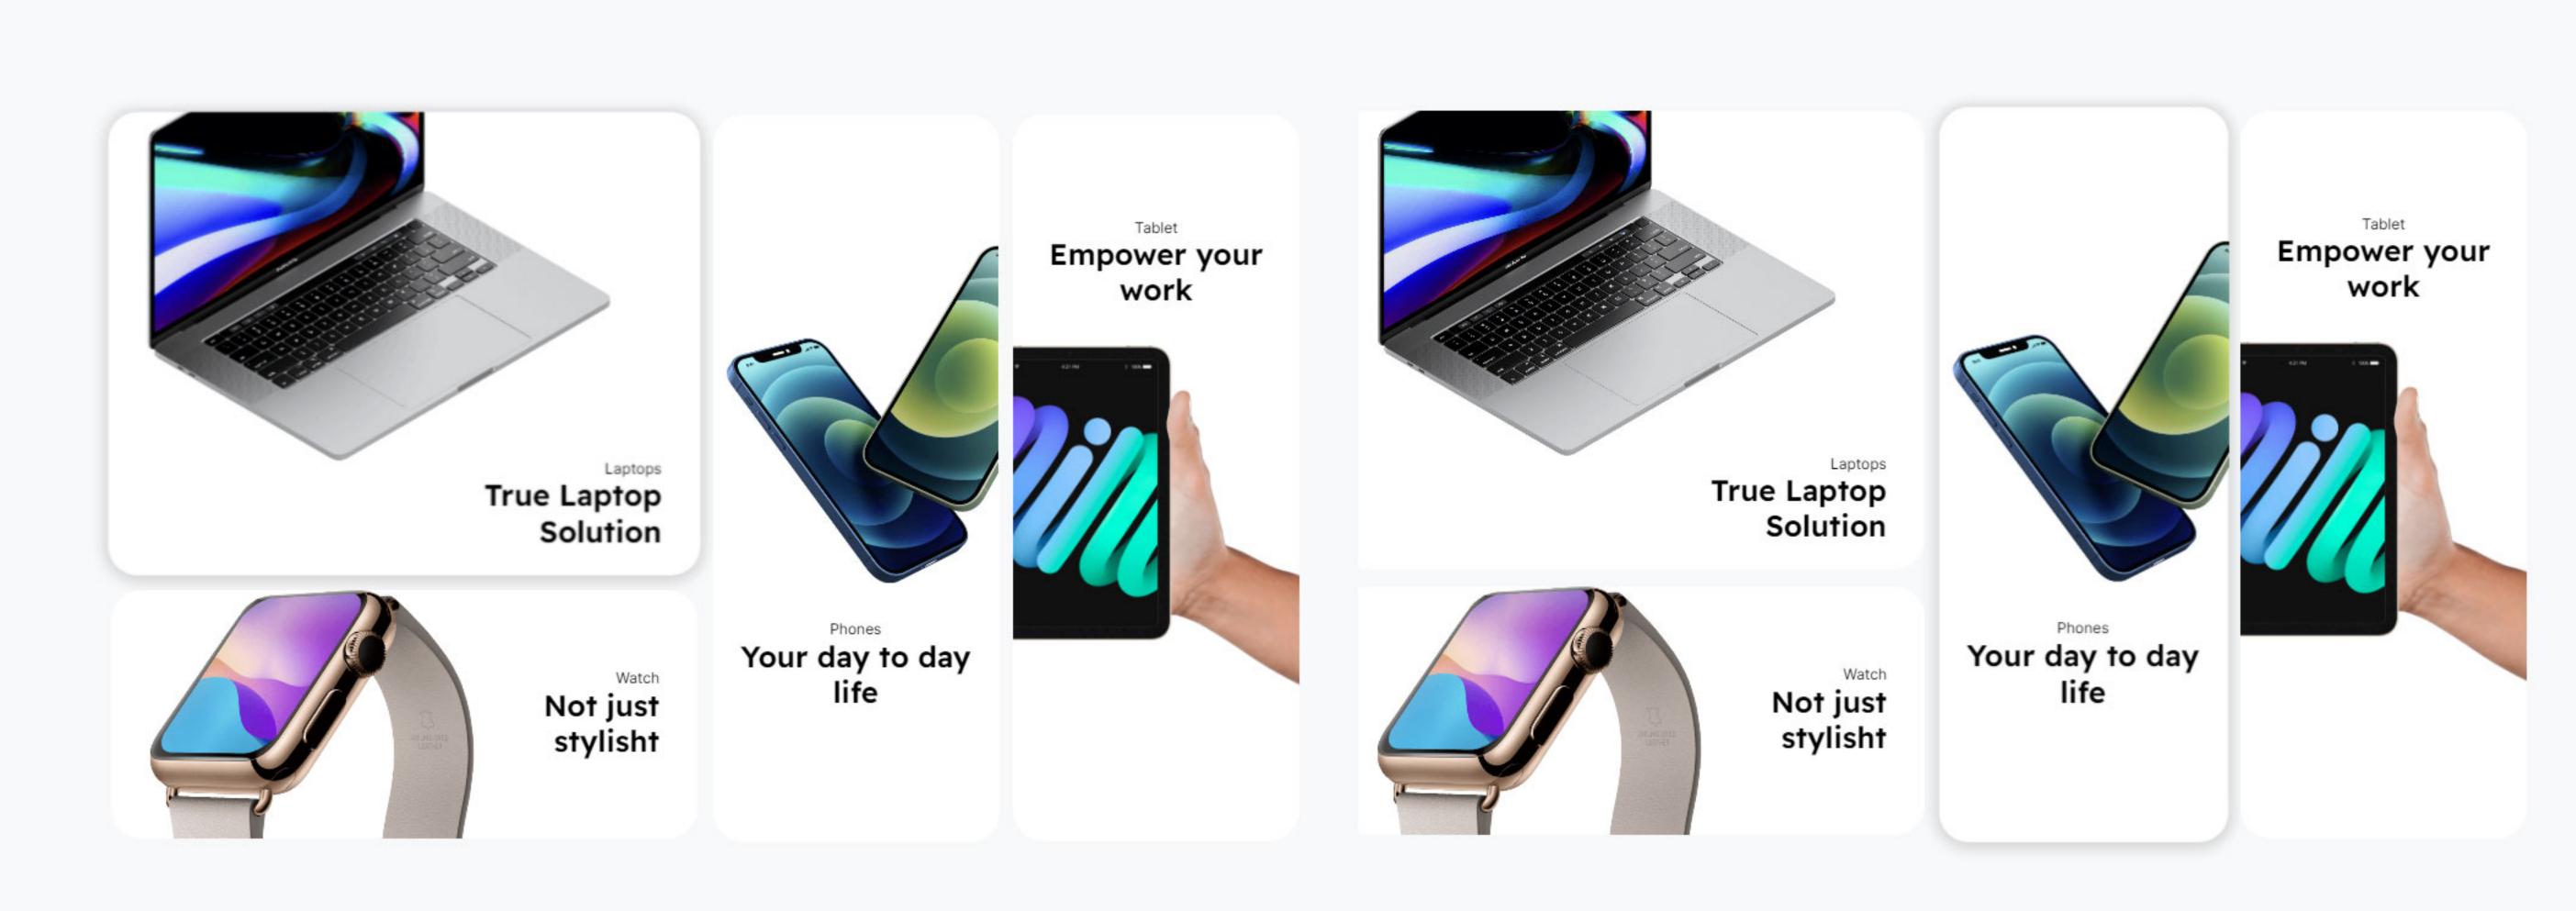

Toggle "Solutions" menu on click, implement hover effect

Banner Carousel, left and right arrows on either side displays the next banner.

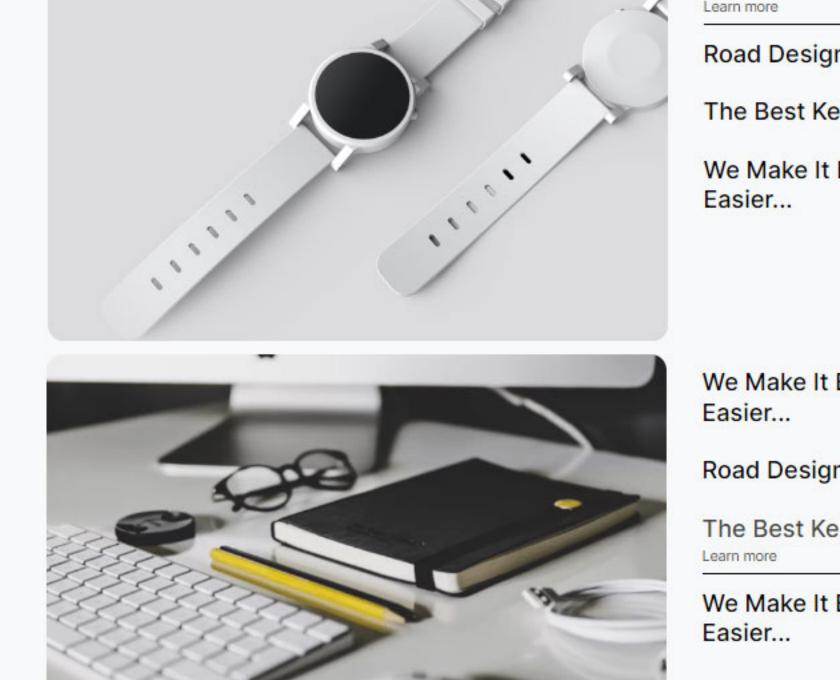

Hover effect on product display, slightly zoom in, with rectangular border, animate with css

Hover effect on product display, slightly zoom in, animate with css

Hover effect on all "Explore" button, 0.6 opacity, animate with css

Change the image when hovering over the text, with fade in/out css animation
